SUMMARY

Full Stack Developer with deep knowledge of client-side and server-side web technologies some of which are HTML, CSS, SCSS, JavaScript, jQuery, React.js, Node.js, and MongoDB. Worked on 50+ web pages, excited to work on new projects, improve knowledge of technologies, and continue to grow. Able to effectively self-manage during independent projects, as well as collaborate in a team setting.

PROFESSIONAL EXPERIENCE

Full Stack Developer

04/2021 – present | Zadar, Croatia

Self-employed

- Created a subscription-based copy trading platform for a client's startup company using HTML5, CSS, Javascript, MongoDB, and NEXT.js resulting in a 100% increase in sales.
- Engineered the authentication system, database, subscription system, email notifications, and payment processing by utilizing NEXT.js, MongoDB, HTML, CSS, and JavaScript.
- Modernized login and register routes by adding an option to sign in with a google account achieving a 30% increase in account creation.
- Improved user feedback by 75% by implementing a dark theme.
- Integrated a free messaging app that increased customer feedback by 60%.
- Developed and designed the front-end of 20+ web pages for a DeFi Banking web application by utilizing HTML, CSS, React.js, and Redux.
- Expanded clients' view of the website by adding Google Analytics.
- Updated front-end to support smaller and larger devices for 20+ routes allowing for better web accessibility and user experience.
- Boosted loading time by 10% by converting images to webp format and next.js image tag.
- Converted 10+ Figma and AdobeXD web page designs into fully functional web applications with HTML, CSS, JavaScript, and React.js.
- Clarified 20+ website mistakes and integrated fixes using HTML5, CSS, JavaScript, and JQuery which resulted in a better user experience.
- Incorporated 5+ different charts including Gantt chart from Frappe Gantt React library and added drag and drop functionality for tasks which allowed for better accessibility and user experience.
- Implemented secure payment gateways such as PayPal, Stripe, and Coinbase for 5+ sites.
- Established user input validation on 20+ forms with JavaScript decreasing invalid data sent to the server by 100%.
- Introduced animations to 10+ web pages with React animation libraries which resulted in a better client experience.
- Designed and developed the front-end for a decentralized Chrome plugin that displayed 10+ dynamically updated news articles using HTML, CSS, JavaScript, React, and REST API.
