## Summary

---

Frontend Developer with deep knowledge of client-side and server-side web technologies some of which are HTML, CSS, SCSS, JavaScript, jQuery, React.js, and Node.js. Worked on 50+ web pages and constantly learning new technology. Excited to work on new projects and utilize my skill set and continue to grow.

## Experience

---

### Self-employed | Test, Test

#### Frontend Developer | 04/2021 - Present

- Created a subscription-based copy trading platform for a client's startup company using HTML5, CSS, Javascript, MongoDB, and NEXT.js resulting in a 100% increase in sales.
- Engineered the authentication system, database, subscription system, email notifications, and payment processing by utilizing NEXT.js, MongoDB, HTML, CSS, and JavaScript.
- Modernized login and register routes by adding an option to sign in with a google account achieving a 30% increase in account creation.
- Improved user feedback by 75% by building a dark/light theme switch.
- Integrated a free messaging app that increased customer feedback by 60%.
- Developed and designed the front-end of 20+ web pages for a Defi Banking web application using HTML, CSS, React.js, and Redux.
- Granted clients a better view of their website by adding Google Analytics.
- Updated front-end to support smaller and larger devices for 20+ routes allowing for better accessibility and user experience.
- Optimized images by converting them to webp format and using the next.js image tag resulting in a 10% decrease in loading time.
- Converted 10+ Figma and Adobe XD web page designs into fully functional web applications using HTML, CSS, JavaScript, and React.js.
- Clarified 20+ website mistakes and integrated fixes for them using HTML5, CSS, JavaScript, and JQuery which resulted in a better user experience.
- Incorporated a Gantt chart using JavaScript and Frappe Gantt React library and added drag and drop functionality for tasks which allowed for better accessibility and user experience.
- Implemented secure payment gateways such as PayPal, Stripe, and Coinbase for 5+ sites.
- Used JavaScript to validate user input on 20+ forms to prevent invalid data from being sent to the server.
- Introduced animations to 10+ web pages using React animation libraries which resulted in a better client experience.
- Designed and developed the front-end for a decentralized Chrome plugin that displayed 10+ dynamically updated news articles using HTML, CSS, JavaScript, React, and REST API.
