PROFILE

Dedicated, hard-working full-stack web developer with freelance experience building responsive websites. Proficient in HTML, CSS, JavaScript, React.js, Node.js, and other web-related technologies. Looking for a part-time position as a front-end, back-end, or full-stack developer.

EMPLOYMENT HISTORY

Freelance Web Developer

May 2021 — Present

Some of the projects I have worked on as a freelancer web developer include:

RocketWizard (Feb 2022 - Jun 2022)

A web application that allows users to automatically copy positions that are opened, managed, and closed by a specific trader on the site.

- Developed the front end according to the responsive design that was provided by the designer
- Developed the back end which includes features such as user authentication, subscriptions system, and email notifications.

EBankc (Jan 2022 - Feb 2022)

A Defi banking web application that allows users to earn interest, borrow, and exchange digital assets.

- Developed the front end which included more than 14 different pages.
- Made the design responsive for larger and smaller devices.

Sanomind (Apr 2022 - Apr 2022)

A web application for therapists and psychologists which allows them to create their podcasts, share exclusive content, and much more.

- Fixed various issues such as spacing, size, and typography mistakes
- Optimized images for faster loading and removed blur

Honeycomb (Sept 2021 - Nov 2021)

Software as a service web application that helps home builders track, manage and organize stages of their work.

- Developed the front end according to the design which included a Gantt chart and a drag and drop feature for tasks
- Developed the back end and connected it with the front end
